## RECENT PROJECTS

### Star Caps (<https://www.starcapshouston.com>)

Technologies used: React, Javascript, Gatsby.js, GraphQL, GraphCMS, Bootstrap, Sass

Designed and developed website for a local small business. Spearheaded UI redesign utilizing Gatsby.js, Bootstrap, and Sass. Handled GraphCMS API integration and content creation. Attended on-site meetings with client. Improved internet presence and brand awareness by increasing traffic to the website by 28% on average per month.

### Lumikhâ Arts Showcase (<https://lumikhaartsshowcase.com>)

Technologies used: HTML, CSS, Materialize, Javascript, jQuery

Created a web application to showcase information for a nonprofit arts showcase. Led UI development using HTML, Materialize, and Javascript. Oversaw deployment of project to Github Pages. Exceeded project aim of lessening the environmental impact of the event by decreasing paper waste generated during event.

## EXPERIENCE

### Web Developer, Freelance – Dec 2019 - Present

- Consult with entities to craft robust and responsive websites that fit their needs

### Audiology Assistant, Texas ENT Specialists – Mar 2016 - Feb 2020

- Supported audiologists in patient care and management, including troubleshooting issues with device functioning and educating patients on proper care and maintenance
- Enhanced patient satisfaction by promptly addressing inquiries and concerns
- Utilized medical computer-based patient record system to record detailed outcome notes
- Managed department equipment, supplies, and stock to facilitate an optimal work environment

### Internet Analyst/Independent Contractor, RaterLabs – Sept 2013 - Apr 2018

- Enhanced the efficiency of a popular search engine by providing comparative analysis of search results
- Synthesized data into valuable insights to improve user experience across multiple platforms
- Worked to maintain a high level of data rating accuracy monthly
